WORK EXPERIENCE

Microsoft | Software Engineer II

Bengaluru, India | Jan 2025 - Present

- Delivered **8+ customer-facing features** and platform enhancements across frontend and backend, including Event Access Policies, Sensitivity Label Enforcement, Co-location support, and Attendance Reports.
- Led DRI and live-site operations across OneEvents, enhancing monitoring, telemetry, dashboards, and incident response processes while **reducing active incidents by 58%**.
- Shipped 4 agentic AI tools (log RCA, ICM triage, feature flag inspection, PR review) via MCP/Skills, automating **6 engineer-hours/day** of ops toil in OneEvents.
- Technologies Used** - React.js | TypeScript | GraphQL | REST | Agentic AI | MCP | OOPS | Azure

Kotak Mahindra Bank | Software Development Engineer

Bengaluru, India | June 2023 - Jan 2025

- Developed Credit Risk platform reducing the complete risk report creation time from **20 days to 1 hour**, also reducing monthly vendor costs by **5,00,000 INR**.
- Optimized mapping of client collateral with loans, thereby improving Capital Adequacy Ratio by **1 percent**.
- Designed, implemented, tested, and launched a bank-wide call reporting dashboard used by **5,000+ relationship managers** for structured call logging and client interaction tracking.
- Technologies Used** - FastAPI | MongoDB | Python | Elasticsearch | Kafka | Airflow | Docker | AWS

Amazon | Software Development Engineer I

Bengaluru, India | June 2022 - February 2023

- Expanded CTC Review Solicitation Model to CA, UK and IN marketplaces, generating an overall annualized Transactional CP of **\$178 Million**.
- Modernized the GREP Targeting System by improving the **alarming system, job scheduling** along with **memory optimization** in Spark Jobs.
- Served as the **Operational SPOC** for the team for 4 months (Sept 2022 - Dec 2022), reducing the incoming ticket count from **110/week to 80/week** by automating triage and resolving root-cause alert gaps.
- Technologies Used** - PySpark | Python | AWS | Git

American Express | Engineer III

Bengaluru, India | August 2021 - June 2022

- Onboarded 200+ services on **India Data Localization Project** to comply with RBI data norms.
- Created an **AI-SlackBot** using **RASA NLU** framework to solve general cloud engineering queries.
- Modernized the existing platform using **PySpark** and other open-source technologies like **HDFS, Airflow etc.** to build in-house architecture.
- Technologies Used** - PySpark | HDFS | Python | RASA NLP | Kubernetes | Docker

SKILLS

Backend: Python, FastAPI, PySpark, REST APIs, GraphQL, Microservices, Kafka, System Design

Frontend: React.js, TypeScript, Javascript, Tailwind, HTML5

AI Engineering: Agentic AI, RAG, MCP, LLM Applications, Context Engineering

Databases: PostgreSQL, MongoDB, Redis, DynamoDB, Elasticsearch, Pinecone

Deployment & Monitoring: Azure, AWS, Docker, Kubernetes, Airflow, CI/CD

Computer Science: Data Structures, Algorithms, Distributed Systems, DBMS, Computer Networks, OOPs, Git

EDUCATION

Punjab Engineering College (PEC)

Chandigarh, India

Bachelor of Technology, Computer Science Engineering : *CGPA: 8.77*

2017-2021

HONORS & AWARDS

- Awarded Charu Puri Memorial **Best All-Round Performer Award 2021**, for best performance in academics and club activities four years combined (2017-2021).
- Appointed as the **Chief Secretary Technical Societies** for the academic year 2021-2020, the highest technical student position at PEC responsible for managing 12 societies.
